Life Science Notes 20

Natural Selection vs. Artificial Selection

Size and shape of living things can change

naturally or be changed

artificially by humans.

An example of natural selection:

Darwin's finches

Have different beaks for different

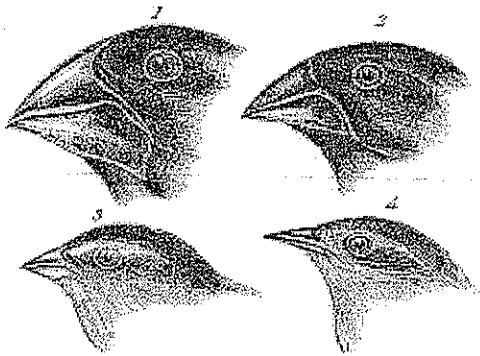

jobs.

An example of artificial selection:

Dog breeds

Humans have been designing dogs

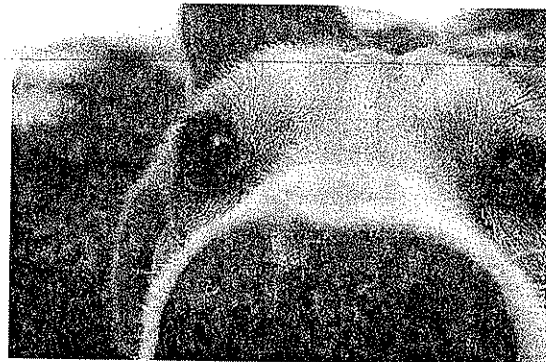

for thousands of years.

1. Geospiza magnirostris
3. Geospiza parvula

2. Geospiza fortis
4. Certhidea olivacea

Finches from Galapagos Archipelago
