

## Video

- 1) Accuracies -
- we came from apes
  - we came from the ocean

## 2) Inaccuracies -

- we didn't look like we are now when we were evolving
- evolution is not quick

## Myths

1. Humans "came from" monkeys

2. Evolution is "quick"

3. Evolution is "goal directed"

4. Evolution is "just a theory"

5. Evolution seeks to explain the origin of life

## Dispelled

We are classified as great apes or Hominidea.

Normally evolution takes an extremely long time

We change for survival not for goals.

A theory is backed up with true evidence. It's not a hypothesis.

Evolution is only concerned with one thing  
How species change over time.
